

CONTACT PRESSURE GAUGE WITH DIAPHRAGM

Chemical execution
Thread or DIN flange

Nominal size 100 and 160

Accuracy class 1,6 and 2,5

DIN EN 837-3

For tough requirements such as for use in industrial production plants. For highly viscous and crystallizing substances, open connection flanges are used, which enable easy cleaning.

Limit signal transmitters open or close electrical circuits depending on the pointer position of the pressure measuring device.

DRUCK & TEMPERATUR

Type	4312	4412	4512	4612	Options
Nominal size	100		160		
Symbol					
Silicone oil filling	without filling	with filling	without filling	with filling	
Type of contact	Magnetic snap-action contact or inductive contact				
Accuracy	Class 1,6 Class 2,5 with liquid filling and measuring ranges < 600 mbar				Class 1,0 or 0,6
Ranges	0...10 up to 0...400 mbar (flange diameter 160, opt. 400 mbar flange Ø100) 0...0,6 up to 0...40 bar (flange diameter 100) -0,6...0 up to -1...+15 bar (flange diameter 100)				other graduations and other units
Applications	Constant load: full scale value Alternating load: 0,9 x full scale value Overload, short time: 1,3 x full scale value				higher overpressure safety
Case	CrNi-steel				Safety housing
Bayonet ring	CrNi-steel				
Measuring element	CrNi-steel				
Connection	CrNi-steel				
Thread, flange	G1/2 B, bottom or DIN-flange (see tables at next pages), PN40				others on request, Channel drilling Ø10mm
Wetted parts	CrNi-steel, sealing FPM (Viton)				PTFE coating, Tantal, Silver
Window	Polycarbonate				Safety glass
Movement	CrNi-steel

Magnetic snap-action contact

Application

Magnetic snap contacts can be used in different operating conditions.

Contact protection relays are recommended for high or low switching capacities.

Electronic contacts are used in liquid-filled measuring devices to avoid incorrect switching.

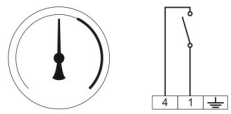

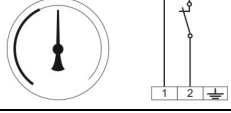

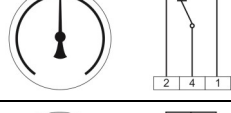

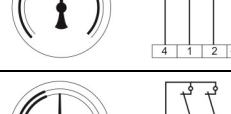

Attention: Only inductive contacts with ATEX approval may be used in potentially explosive areas.

With nominal operating voltages > 50 VAC or > 120 VDC, the contacts must be reliably earthed according to DIN VDE 0110.

Technical data

Switching voltage:	max. 250 V
Min. switching voltage:	24 V (with ohmic load and operation in air)
Switching current:	max. 1,0 A
Continuous current:	max. 0,6 A
Minimum current:	20 mA
Switching power:	max. 30 W; 50 VA
Minimum switching power:	0,4 W; 0,4 VA
Contact material:	Ag80 Ni20
Switching accuracy:	ca. 2-5% full of scale value

Switching function

Type	clockwise under increasing pressure	Cable socket connection diagram
M-1	Contact closes	
M-2	Contact opens	
M-3	1-fold changeover contact (1 set point)	
M-11	Contact 1 closes Contact 2 closes	
M-12	Contact 1 closes Contact 2 opens	
M-21	Contact 1 opens Contact 2 closes	
M-22	Contact 1 opens Contact 2 opens	
M-33	2-fold changeover contact (2 set points)

Inductive contact

DRUCK & TEMPERATUR

Application

Inductive contact in pointer-type measuring instruments are equipped with electrical distance sensors (proximity sensors) in accordance with DIN 19234 resp.

When using the Ex isolating switch amplifier, the equipment corresponds to type of ignition property "I". It is approved under the classification EEx ib II C T6 for use in potentially explosive areas (zone 1 and 2).

Multi-function relays are recommended for installation in normal industrial plants for which explosion protection is not required.

Technical data

Nominal voltage: 8V = (Ri = 1 k OHM)
 Operating voltage: 5...25 V
 Current consumption: approx. 1...3 mA
 Switching accuracy: approx 0,5% of full scale value
 Ambient temperature: -20°C...+70°
